

# Polyfoam<sup>®</sup> LINER

Flexible material, compatible with many products. It is chemically and mechanically resistant, making it a versatile product as it can be easily cut to size. It can be used in various industries, such as flooring, carpet, and bottle caps. In the carpet industry, it is used as a base for damping and leveling, as well as an acoustic barrier.

Adds support, improves stability and increases the life of the mat.

Improves softness and cushioning for end user comfort.

Prevents the transmission of viruses, molds and bacteria.

Recoverable investment for being a reusable product.

Sale by roll or adaptable to your scoring and cutting needs.

Adaptability to all types of thermokings for crossing borders.

Easy to use and manipulate.

Its roll presentation makes it easier to use.
