

# Insufoam<sup>®</sup> 2500

The most convenient and simple option in thermal insulation for ecological homes. Insufoam 2500<sup>®</sup> is manufactured under the highest standards to achieve optimum performance in the home construction industry, it has an excellent solution for thermal insulation on walls, roofs and false ceilings. An ideal solution for new buildings as well as for renovations.

High thermal resistance value.

Low thermal conductivity.

Hydrophobic  
(Does not absorb humidity)

Zero flame spread in case of fire.

Perfect adherence with paste finishing, vinyl, paint, elastomeric sealant, and solvent free adhesives.

Excellent compressive strength.

Optimizes energy consumption of air conditioning and heating equipment.

Helps to control the transfer of heat conduction, convection and radiation.
