

# Insufoam<sup>®</sup> 6000

The best solution for thermal insulation in floors. Insufoam 6000<sup>®</sup> are processed extruded Styrofoam panels for civil engineering and other commercial applications. Available in a wide range of presentations to meet the needs of the construction industry, where adequate insulation is required for heavy-duty applications.

High value of thermal resistance.

Availability in different thicknesses and lengths.

Zero water absorption.

Immediate availability in standard measurements.

No maintenance needed.

Long term thermal stability.

Optimizes the energy consumption of the air conditioning and heater.

Helps control heat transfer, conduction, convection, and radiation.
