

EXTRUDED POLYSTYRENE PLANKS

Rigid polystyrene foam panels thermal insulation, the best solution and the best performance in thermal resistance.

With it's compressive strength, zero moisture absorption, it offers the best cost-benefit results and the longest life-time.

FEATURES:

- Does not absorb moisture
- High thermal resistance value
- 100% recyclable
- Prevents mold or bacteria build-up
- Compressive strength
- Thermal stability
- Great protection
