

## RIGID PLANKS OF EXTRUDED POLYSTYRENE FOAM

Rigid polysterene foam panels for thermal insulation, the best solution in thermal resistance and appearance.

Ideal for insulating metal buildings and constructions, warehouses, shopping centers, assembly plants, prefabricated classrooms, auditoriums, supermarkets, thanks to it's structure of very closed cells and it's great finish.

### FEATURES:

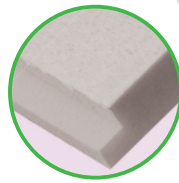

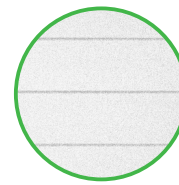

- Does not absorb moisture
- High thermal resistance value
- 100% recyclable
- Drywall substitute
- Prevents mold or bacteria build-up
- Compressive strengt
- Thermal stability

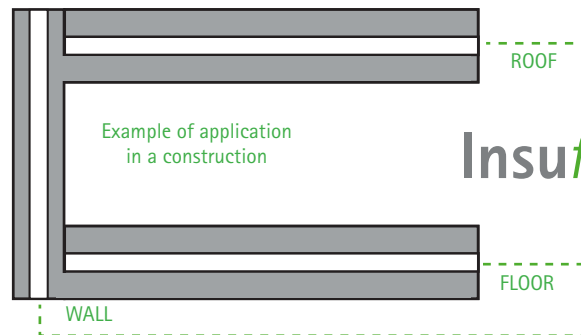

Fire Retardant  
Non-flammable

TEXTURED

WITH OVERLAP
